

The School of The 21st Century

Patcharin Saefrung has developed a plan for a school of the 21st century by analyzing and expanding upon AAF's principles of school design: Design Schools to Support a Variety of Learning Styles, Enhance Learning by Integrating Technology, Create Schools as Centers for the Community, and Make Healthy, Comfortable, and Flexible Learning Spaces. In her colorful, visually bold drawings, Patcharin

investigates and provides examples of how a school facility could encourage student learning in a variety of ways –from incorporating the latest technology to participating in field trips.

San Jose High Academy,
San Jose, CA

Jury comment:

“This submission focuses not on a specific physical space, but instead on Patcharin’s understanding of the essence of school and the multiple ways in which students learn. The drawings make the leap between various learning styles and fields of study through their bold diagrams and organization of space.”
